

Reclaimed Hose Repairs

The City of St. Pete Beach and Pinellas County are responsible for the maintenance and repairs of the reclaimed water transmission and distribution lines within the city. This includes the reclaimed water curb stop located in the city easement of the property. The homeowners are responsible for any repairs or maintenance from the reclaimed water box to their irrigation system that is located on their private property.

A special device is required to connect reclaimed water to your hose. This quick connect assembly is supplied by the city. The hose must be at least 5/8 of an inch in diameter. If you need a quick connect assembly or are having problems with your reclaimed hose, please call our Public Services Department at 727.363.9243.
